

# Billboards, Informational or Chromodek Signs

*Attractive signage is a fundamental part of any operation, making your business more visible and increasing awareness among customers and potential customers alike.*

## Billboard / Informational / Chromodek

Chromadek is a metal sheet that has been galvanized (anti-rust) and coated with a white paint. The chromadek sheet is 0.66mm thick and we produce a signs with or without frames. By using 25mm square tubing to make the frame for chromadek signs, it gives durability and stability.

The image or advertising message that you want to display on the chromadek sign is digitally printed on high quality vinyl. The vinyl sticker is then applied to the chromadek sheet.

Chromadek signs have a lifespan of ±5 years; however the digital printed vinyl will fade after a period of time. If a clear vinyl (we call it laminate) is applied over the digital print of the chromadek sign, your sign will last longer.

### Option 1 :

Chromadek sign on monomeric vinyl, printed in full colour  
**R 390.00** Per square metre

### Option 2 :

Chromadek sign on monomeric vinyl, printed in full colour  
\* Laminated with clear vinyl  
**R 490.00** Per square metre

### Option 3 :

Chromadek sign on monomeric vinyl, printed in full colour  
\* Laminated with clear vinyl  
\* Mounted on 25mm square tubing frame  
**R 670.00** Per square metre

\* Complete with full set of poles ready for erection 2mm wall thickness 3.5m in length

50mm R 400.00

76mm R 530.00

100mm R 930.00

### Option 4 :

Chromadek sign on monomeric vinyl, printed in full colour  
\* Laminated with clear vinyl  
\* Mounted on 25mm square tubing frame  
\* Erected in pretoria, johannesburg  
\* And surrounding areas  
**R 890.00** Per square metre

For signs of 10 - 0 square meters, add ± R 800 additional for support poles

## Where they can be used?

- Development Boards or Site Boards
- Informational Signage
